

## Backend Software Developer

### About our client

Our client is an established stock image site and media handling platform, located in Odense, Denmark. They are a close-knit team of 30 people with different nationalities. Their function is to help users share, organize and edit images. Their customers include major public and private clients, such as the Danish Ministry of Justice, a large part of the municipalities in Denmark, as well as several major corporations like as DONG and DSB.

They are experiencing rapid growth, and need someone to help their company take full advantage of this, as well as keeping the growth continuous. They need a competent candidate to help develop the platform and ensure a fantastic user experience and convert visitors into paying customers.

### Job Functions

You will be involved in mining and analysing data in creating new and innovative solutions. You will help implement these new solutions and make sure they work fast, are robust and scalable. You will also be working on existing solutions, improving and extending to adapt to the ever-changing needs of customers. You will be involved in the whole process from analysis through design to implementation.

### Your Qualifications

You hold a degree in computer science or equivalent, and you love to apply theoretically well-founded solutions to build new exciting functionalities. You know when to apply a B-tree, create a complex database index, use a NoSQL-database, use dynamic programming and maybe even have experience with machine learning. The services run on AWS infrastructure, consisting of Linux servers that run open source software such as NGINX, MySQL and Elasticsearch, and custom built services written in PHP, Python, Go and C.

## What we offer

A full-time position, working from the HQ in Odense. You will be offered a competitive wage with the ability to be influential while enjoying professional freedom with responsibility. Flexible working hours, a pleasant office environment, a pension plan, a lunch arrangement, and a supportive work climate with ambitious and energetic international colleagues. You will become part of an expanding, successful international business.

## Interested?

If this is you, we want to hear from you! Send your CV and Cover Letter to Recruitment Lead, Aleksandra Domanowska at [ad@coderesourcing.com](mailto:ad@coderesourcing.com) by the 7th of January 2018.
