

Software Engineer (All-Levels)

Product Development-Singapore, Singapore

About our Client

Join TenX in building the future of payments in Rust! TenX is building a payment platform in the cloud to allow the customers to spend blockchain assets at any merchant that accepts payment cards.

TenX is a growth-stage startup with a culture and environment to match. That means that you can expect to find a fast-paced environment, bleeding-edge technology, and a group of highly motivated self-starters collaborating to change the world.

TenX is looking for software engineers who aren't afraid of working with new technologies and have the track record to prove it. Past experience and the right tech-stack is important, but it is more essential that you are motivated, self-driven, and willing to grow and learn. Contributions to open source software projects, experience building startup MVPs, giving talks, and organizing communities are highly valued. TenX engineers are experts in their fields and leaders among their peers; it is expected from you to have these qualities too.

Requirements

•You should have:

- 1) Professional proficiency with both object-oriented and functional programming paradigms, and professional proficiency with at least one language in each category, or
- 2) Professional proficiency with Rust, or
- 3) Professional proficiency with Javascript and Node.js AND expertise in mobile and/or frontend development

•Experience building, deploying, and maintaining microservices or serverless architectures (i.e. AWS Lambda) in the cloud

•Experience using Docker to create reproducible build and deployment pipelines

•Expertise with Linux

•You know what “immutable” and “idempotent” mean. You can explain how and why these traits are important, citing specific examples from your professional experience.

The position is open to engineers at all levels of seniority, and a matching position will be offered.

The Benefits

•A casual work environment where results matter more than office time

•Developer-friendly hardware, whether it's Linux or Mac that you prefer

•Benefits that exceed most large companies, from lunch reimbursement to rental rebates!

Please have a look at TenX's core values and team culture:

Application process

Please apply by sending your CV to Christian Payne Code Resourcing (email: cp@coderesourcing.com). The process will consist of a first interview with us at Code Resourcing, after which we will arrange the interview process with TenX, conducted mostly by calls/online video.
